Certificate No. 2775 01

1st December 2009

REACH POLICY

REACH is the new EU chemicals legislation for the Registration, Evaluation and Authorisation of Chemicals, which came into force on the 1st of June 2007. This requires manufacturers or importers of substances to register them with a central European Chemicals Agency (ECHA) and applies to quantities of over one tonne per year.

At Newport Industries we have a dedicated REACH team that is appropriately addressing the requirements of the legislation. We hereby confirm that Newport Industries has successfully pre-registered all the substances we supply in the EU today or have ensured that these are being pre-registered further up the supply chain.

Furthermore, Newport Industries has obtained pre-registration numbers for all of our pre-registered substances. As these numbers are not company or substance specific it is advised by the EU commission that these need not be published. Accordingly, our policy is to not provide pre-registration numbers.

At this stage we plan to complete the registration of our products in compliance with the schedule provided by the legislation. However, we cannot guarantee that the registrations currently planned will go ahead for the long term registration deadlines of 2013 and 2018. Please be assured that Newport Industries will make every effort to notify our clients of such an event.

Should you have any concern or require any further information, please contact our REACH Team on +44 208 742 0333.
